

The Broadcast Flag Mandate seems to be more about removing the rights of citizens in favor of big corporations and for no good reason. The airwaves are supposed to be the property of the citizens and companies are allowed to broadcast on them because we let them. The airwaves and what is contained on them should be open to all and not restricted to only those that pay whatever the industry what wants. Also it places undo restrictions on what can and cannot be done on a personal computer for no good reason. Please do not enact the Broadcast Flag Mandate and leave the airwaves and computers free for all to access.

Thank you
